## **NEW RADIO AND RADAR INTERCEPT COMPANIES IN THE TRANSBAIKAL MILITARY DISTRICT, USSR (S)**

1. (S/D) Two radio and radar intercept companies were identified in separate vehicle parks (Figure 1) at Naushki Army Barracks AL-1 [REDACTED] USSR, on imagery of [REDACTED] Naushki is on the Ulan-Ude—Peking rail line, 2 nautical miles north of the Mongolian border, and is the third installation in the Transbaikal Military District to house this type of unit. The other two units are at Kuda Radcom Receiver Station Krug Support [REDACTED] and Radost Radcom Receiver Station Direction Finding Support [REDACTED]. The first unit is battalion sized, and the second is probably battalion sized.

2. (S/D) The radio and radar intercept companies at Naushki are garrisoned with combat and combat support units subordinated to army level. The number and types of equipment (Figures 2 and 3 and Table 1) indicate that the radio and radar intercept companies are probably subordinate to army level. The collocation of these units with other army-level assets strengthens this probability.

3. (S/D) The equipment for both units (75 to 80 vehicles each) is stored in the open. One 16-bay double-depth vehicle storage building was being constructed in Area E (Figure 2); this building could easily house all of the key signature vehicles of one company. No construction was observed in Area G (Figure 3).

(S) Comments and queries regarding this report are welcome. They may be directed to [REDACTED] Warsaw Pact Forces Division, Imagery Exploitation Group, NPIC, [REDACTED]
